TECH RIDER FOR *Nebulae*
a 14 minutes 25 seconds immersive audiovisual piece by Joanie Lemercier and Joshua Sabin, 2019
for 180° dome
Artist production by Juliette Bibasse, jbibasse@gmail.com

Nebulae

With *Nebulae*, experience a unique journey into the cosmos and through time: take off from a familiar terrestrial landscape, aiming at the stars and beyond. Explore galaxies, constellations and witness several mesmerizing cosmic events from the past. *Nebulae* is an audiovisual installation offering an artistic interpretation by Studio Joanie Lemercier of our stellar universe.

Concept and visuals : Joanie Lemercier
Production: Juliette Bibasse
Software development: Sebastiano Barbieri, Nikolay Matveiev, Kyle McLean / Everyoneishappy
Sound mix: Thomas Vaquié
Music: Joshua Sabin (used by permission from Multiverse Media Publishing and Subtext Recordings)
Commissioned by MEDIAPRO & Sónar+D 2019

SPECS
Resolution: 4096x4096
Jpeg sequence video files, to be SYNCHED through Dropbox
codec: image sequence JPG
Framerate: 30 fps
Length: 14min25sec

Wave sound file "nebulae.wav (317 mb)" to be synched with the video file

Audio: WAV PCM 44100Hz stereo 2304kbps (32bits)
Length: 14min 25sec

REQUIREMENTS
Nebulae is an immersive piece made to be projected in a dome.
The piece requires total darkness and optimal sound setup, without any light or sound pollution.
It should be presented to the public as screenings (not as "come and go" loops)

Press visuals: https://joanielemercier.com/press/nebulae/

PROVIDED BY THE ORGANIZER
- Projector(s) and media server from image calibration and content warping
- A minimum of stereo sound system or anything higher
- A dedicated technical director able to synch the files, encode the files, run tests in the dome **and report any problems to Studio Joanie Lemercier**, at least 1 week before the screening day(s)
- Ideally a dedicated sound technician able to adapt sound mix

---

PROVIDED BY THE STUDIO JOANIE LEMERCIER
- Jpeg sequence video files, CANNOT be downloaded, it is too heavy
It is necessary that you send us an email address linked to a DROPBOX account able to synch 77Go
Allow enough time for the synch to be complete
VIDEO
- Jpeg sequence video files, to be SYNCHED through Dropbox
- codec: image sequence JPG
- **25.975 jpg files** (77.1Go)
- frame rate 30 fps
- total length: 14min 25sec

SOUND
- A wave sound file to be synched with the video file
- Audio: 44100 Hz WAV 32 bit

REHEARSAL
- It is essential that a test screening is being made in the dome before the screening night(s), on a specific day and time to be confirmed with Studio Joanie Lemercier

---

CREDITS AND PICTURES
- The organizer of the event agrees to use all the credits **specified above in any communication assets of the event**
- Studio JL would like to receive at least **a couple of press picture (high resolution) of the event**, or even a video report if one is made by the organizer
